DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 21 (second instance) has been renumbered 22.

Allowable Subject Matter

2. Claims 1-3, 5, 6, 8-11, 21 and 22 are allowed.

3. The following is an examiner's statement of reasons for allowance: Independent claim 1 has been amended to include the limitation of a second porous layer made of a hydrogen permeable material, wherein the solid layer is interposed between the first and second porous layers, which is an arrangement not disclosed in the prior art of record. Claim 21 is allowable because the prior art fails to suggest a motivation for using a first porous layer that has a pore size that varies as a function of distance from the solid layer. Regarding claim 22, the prior art fails to disclose the arrangement wherein the porous layer has multiple thick film layers of hydrogen permeable particles, and wherein each of the thick film layers has a different average particle size. The definitions of the terms "porous layer made from a hydrogen permeable material" and "solid layer of a hydrogen permeable material" are taken from the specification and a hydrogen permeable material excludes a steel mesh because steel is not hydrogen permeable.
